SISCOSIL 650 FINISH

SILICONE HEAT RESISTING FINISH(650°C)

| PRODUCT DESCRIPTION | A single component, based on a modified silicone binder for use on primed steel substrates subjected to temperatures up to 650°C in a wide range of industrial environments, e.g. boiler, cylinder of engine, the inside of the exhaust pipe, radiator stove, oil burner, etc. | | | | | |
|---------------------------|--|--|---|---|---------------------------------------|----------------------------|
| SPECIFIC | Excellent heat resistance up to 650°C. | | | | | |
| PROPERTIES | Excellent weathering properties and overall durability. | | | | | |
| | Excellent adhesion and rust-preventing properties. | | | | | |
| PHYSICAL DATA | Solids (% by volume) | | 42% | | | |
| | Dry Film Thickness | | 15-30microns | | | |
| | Wet Film Thickness | | 36-71microns | | | |
| | Flash Point | | 29 ℃ | | | |
| | Theoretical Coverage | | 52 – 105 m ² /USG/time | | | |
| | | | Metallic aluminium, Black | | | |
| | Gloss Metallic sheen, Matt | | | | | |
| APPLICATION DATA | Application method Airless spray, Brush, roller | | | | | |
| | Temperature m | | 0 °C | | | |
| | Humidity Maximum 85% R.H. | | | | | |
| | For Airless Spray | | | | | |
| | Tip size 0.33 - 0.38 mm. (13 - 15 thou) | | | | | |
| | Pressure 110 – 160 kg/cm ² | | | | | |
| | Viscosity 12 sec. (Ford Cup No.4) | | | | | |
| | Dilution Thinner No.10 (0-5% by Volume) | | | | | |
| | Mixing Ratio - | | | | | |
